Now, Glorious George, a King from Heaven sent,
Assisted by a Loyal Parliament:
He has produc'd a Long and Lasting Peace
To all his Neighbours, and his Subjects Ease;
For which good Work, Lord, let his Memory lye
Enroll'd in Gold, to all Posterity. A 2

Here seems to be rough Work cut out for this and some succeeding Months; for H is come back into ♂ , which tends to further corruption of Justice, and is in opposition to $\odot$ and ♀ , and the Superiors H and ♂ are in square from Cardinal Signs; with several Configurations to the same purpose, which is of ill consequence to the Countries hereby signified; and tho' by the Interposition and Mediation of other well-wishing Princes, some things might be brought to better accommodation, all seems at present to be of little use.

The Congress of the Planets towards the latter end of the last Month, will presently begin to shew their Effects. *Mercury* being in Conjunction of the *Sun*. 14 and ♂ in the Royal Sign ♄, brings Account of the Motion of Armies and of furious Engagements in some Southern parts of the World, which seems to be much against the *Turks*, of which we may expect our News to be mostly true, there are some amongst us, at or near this time seems weary with fruitless Expectations, and is obliged to sit down under no small Discontent, and how that came to pass Time has fully discovered it to them, and for a Conclusion of this Months Observations, I heartily wish that a sickly Season does not break in upon us as well as some other Countrys.

September hath XXX Days.

Whirlwinds or Snow : With Mercury Winds which often produces Rain. Mercury being Aspected with any Planet, at any time of the Year, provoketh Winds and raiseth Clouds. All respects for every Day in the Year are to found in the respective Right-hand Pages of this Almanack.

The Use and Explanation of the foregoing Table of the Pleiades or Seven Stars.

THE Table of the *Pleiades* or *Seven Stars*, contains
Columns ; the first towards the Right-hand expresseth
every Fifth Day of the Month, as, 16, 11, 16, 21, 26,
And the Second shews their Rising in Hours and Minutes
The Third their Southing. The Fourth their Setting,
plain by their very Titles ; and herein you are to Observe
that the Letter (a) signifies Afternoon, and the letter (b)
forenoon, or Morning, and so likewise in the 5th, 6th,
7th Columns the same, and also in the 8th, 9th, and 10th
which is plain to the meanest Capacities, as for

Example.

Suppose you desire to know the Rising, Southing,
Setting of the *Pleiades* or *Seven Stars* ; on *January* 21
find they rise at 10, (b) 16, which shews they rise at 10
the Clock and 16 minutes past, before Noon, as the Letter
(b) at top denotes ; they are South the same Day, at 6
32, that is, at 7 a Clock and 32 minutes past, in the After-
noon, as the Letter (a) at the Top signifies in the 5th
Column, and in the Third Column you find they set the
21st of *January*, at two (m) 48, which is 2 a Clock and 48
minutes past in the morning signified by (m) by which Letter
is meant morning : Again on *February* 21 they rise at 8
minutes past before Noon, South at 4 and 30 minutes past in
Afternoon, and set at 12, and 46 minutes past in the morning
Again *March* 21, they rise at 6, and 31 minutes past in the
morning, South at 2 and 47 minutes past in the Afternoon,
and set at 12, and 3 minutes past in the Afternoon, or Morning
and so of all the rest of the Months, which is both plain
easy to the meanest Capacity, and of great use to the Common
Man, &c.

Of the Eclipses this Year.

Within this Years Circumference will happen Five Eclipses of the *Luminaries*, viz. Three of the *Sun*, and Two of the *Moon*, and only one *Lunar Eclipse* Visible, and they happen as follows.

The First is an Eclipse of the *Sun*, on *Wednesday* the 19th. Day of *January*, near *Seven* in the Morning, it will be but a *Eclipse*; and scarce any of it Visible here.

The Second Eclipse is of the *Moon*, *March* the 5th. Day, at *Three* in the Afternoon, therefore not to be seen in any part of *Britain*, but may be seen in the more Easterly parts of the *Indies*, viz. the *East India*, *Java* the Greater and Lesser; and in the *oriental Kingdoms of Bengale*.

The Third is a Solar Eclipse on *Friday*, the 15th. Day of *April*, near *One* in the Morning, therefore Invisible here; but will be seen in the Southern parts of the *Earth*, as in the *South Sea*, of the *Chinensis*, the *Molucca's* near *Nova-Guinea*, &c.

The Fourth is a Total and Visible Eclipse of the *Moon*, on the 29th. Day of *August* in the Evening, and according to *Wings Tables* in his *Scientia Stellarum*, should appear of the same time and quantity as followeth,

The Fifth Eclipse is of the *Sun* on *Saturday* the 13th. Day of *September*, near *Eight* in the Morning; but will not be Visible here.

As to the Signification of these Eclipses, the First imports *Corruptions*, *Destruition of Fish*, &c. The Second shows fear of the *Productions of the Earth*. The rest portend *Losses at Sea* and great *Mortality of the common People*.

Of

Of the Winter Quarter.

The Sun enters *Capricorn* (which begins the Winter Quarter) 1717, on *Tuesday* the 10th. Day of *December*, 50. Minutes past 8 at Night; Calculated from the Tables in Mr. *Johann Baptist* *Scientia Stellarum*, which I take to be the best Extant, and fairly proved by Observation of that great Solar Eclipse, which happened the 22d. Day of *April*, 1715. At the time of *Ingress* 27 degrees of *Leo* Rises in the East Horizon, and 15 degrees of *Taurus* is upon the *Medium Celi*; and the Planets thus posited: ☉ 00° 00', ♄, ☾ 17° 30', ♀, ♁ 00° 11', ♃, ♅ 2° 00', ♁, ♂ 8° 52', ♃, ♀ 13° 57', ♃, ♀ 26° 50', ♄, ♂ 29° 50'. The Aspects (as considered within the Moieties of the Planets Orbs) are ☐, ♁, ♄, ♁, ♁, ♂, *, ☉, ♁, *, ☾, ☐, ♁, ♀, *, ♁, ♀, ♂, ♀, ☾, ♁, ♀. Now by a due consideration of these Aspects and Configurations of the Heavenly Bodies, I conclude this Quarter will come in Roughly, not only as to the Weather but in different Affairs in Foreign Countries; there will be great Negotiations and Councils on foot, which will doubtless take up time, require the Assistance and Consideration of the most Sages and Wise Heads; both in our own, as well as remote, and Neighbouring Countries; therefore 'tis most rational to Conclude that things of High and Eminent Concernment, will be Transacted in the Councils of this Quarter. Those places where the Fortunate Planets are posited, and those that are Fricke beheld by them, to such they signify good, according to the Nature, which is all I shall say of this Subject upon this Quarter, since the Quality of these Contingences must be left to Time to manifest; for *Particularia prædicet nemo, Sine numine affertur*. For none but those that are endued with Divine Inspiration can foretell Particular Events.

As to the Diseases of this Quarter they are mostly Chancres, Distempers and Infirmities, that now Afflict in general, where many Aged People End their Days.

Of the Spring Quarter.

The Spring Quarter Commences according to the former Tables, on Sunday the 9th. of March 44 Minutes 41 seconds past Night, at which time 19 Degrees of *Scorpio* Ascends, and 9 Degrees of *Virgo* is upon the Midheaven; and the Places of the Stars, and their Aspects follow in this Order ☉ 00° 01', ♀ 1° 00', ♀ 23° 58' 69", ♂ 12° 38' 8", ♀ 26, 25', ♀ 3° 42', ♀ 10', ♀ 66, 25° 15', ☿ 15° 38', ♀ and are thus Aspected

♂ ♃ ♂ ♃ ♀ △ ♄ ☿ ✱ ♃ □ ♃ ♀ △ ♃ ☾ ✱ ♂ ♄
) □ ♄). These Positions seems to be the forerunners of
 troubles Wars and Anxieties, in several parts of the World; Mars
 ard of the Ascendant, and In Opposition to Saturn Luna, and the
 ndant also ; which fore shews Wars and Effusion of Blood,
 hose Countrys signified hereby, which is the more likely,
 eason they are near fixed Stars of a violent Nature ; and
 ly Angular also, which gives but small hopes of Accommo-
 ng torreign former differences, and if we Judge according
 he Major Testimonies of this Vernale Ingress, there will ap-
 so much Falshood, Selfends, and treacherous Designs, that
 ll hopes remains at present of a Peace, tho' the only thing
 ted; for by how much the Planet, who is the significator of
 idents in the World is Superiour, and greater then the
 er Planets, by so much are the Effects signified by him more
 nifest and Visible, and I account the Actions of this Quarter
 e chiefly influenced by the Position of Saturn and Mars,
 ce great Designs are carryed on with deliberation, either
 Power, Policy, or both ; neither would I be mistaken, or do
 eny, but there is something that will correspond with the
 evolent Configurations of the Planets towards the end of
 s Quarter, or the beginning of the next.

As for the Defeases of this Quarter, they should generally proceed from Blood contaminated and corrupted; whence arises the small Pox to a high Degree, and in many places Fevers, Gripings, Vomitings, Surfeits, &c. We may have reason to fear a strange infectious Air, and the too frequent Sudden Death of Persons of Note, as well as the lower and meaner sort of People: Thanks to our good and merciful God, we have hitherto been preserved from Extremity of sickness, or most Violent or mortal Diseases, which not long since Raged in several

Several Kingdoms and Countrys in Europe ; and we know how soon we may fall into the like Extremity ; therefore we pray Daily, from Plague, Pestilence, and other Baggage stempers, *Libra nos Domine.*

Of the Summer Quarter.

THis Summer beginneth when the *Sun* enters the Tenth Sign *Cancer*, which this Year happens on *Tuesday*, the Day of *June*, at 2 Minutes before 11 at Night, when 23 degrees of *Aquary* is Ascending, and 16 degrees of *Sagittarius* on the Midheaven ; at which time the two Infortunes applying to a Square of each other, and the *Moon* Applying to an Opposition of *Saturn*, and to the Trine of *Jupiter* and *Saturn* in Trine to the *Sun* and *Mercury*, and *Mars* Sextile to *Venus*, and Square to the *Moon*, from hence comes with the Preventional *Full Moon*, and Postventional New Moon seems to cut out Work enough for the Summer, and of several kinds also ; for there is likely to appear Stupendous Councils, and very great and mutable Actions, which will likely appear in Martial Affairs, the Merchants this Quarter receive the Welcome of a safe return, to their great Encouragement and Satisfaction ; and I may further add, that such a Conjunction of the Planets as here very rarely passeth over, without some remarkable Disturbances in those Kingdoms and Countrys, where they are appointed by Divine Providence, to pour out their effects ; which seems to be remote from us, where we are likely to find a sharp Summers Work on't, and 'tis not to be questioned, but there is still a troublesome and dissatisfied People amongst us, who only torment themselves and others for their Actions, and Base and Dishonourable Practises, brought to Condigne punishment ; whereas a Civil, Peaceable, and Honest behaviour would procure them Favour from their Superiours, agreeable to their Interest, Quality, and Circumstances, which no doubt would procure them Favour with God and Man.

Of the Autumn Quarter.

ON *Friday* the 12th. Day of *September* 13 Min. past Noon begins this Autumnal Quarter, when 6 degrees of *Sagittarius*

COLEY 1718.

ascends, and 4 degrees of *Libra* is Culminant, at which time
 is in Sextile to *Jupiter* and *Venus*, and *Jupiter* in Sextile to
Mercury. *Mars* is lately separated from the Conjunction of
Saturn, and is in Conjunction with the *Moon*, and at the full
 is Preventional; there happens a Total and Visible Eclipse of
 the *Moon*, and the Postventional *New Moon* a Non-Visible Eclipse
 of the *Sun*, from which Principles there is most likely to appear
 a great variety in the Humours and Actions of Men, in diverse
 parts of the Universe; differences will be further fomented and
 kindled on in some Places, whilst Peace is promoted elsewhere,
 there is very likely to be further War with *Turks* to the Honour
 of the *Christian Empire*; it will appear also, at or near the
 same time, that Peace amongst the *Christians* is industriously pro-
 moted, for there are many healing consultations in this Quarter;
 pray God continue them for the benefit of all good and
 well-disposed *Christians*, for the position of *Jupiter* (ac-
 cording to second causes) turneth things from bad to better, so
 that some hopes appears of better times approaching, and also
 of Controversies and Differences amongst Eminent Persons in the
 World shall decrease: Thus have we traced the Motions and
 Configurations of the Heavenly Bodies throughout this Year,
 from whence have made such probable Conjectures, as is
 most likely to happen to Mankind, within the Limits of this
 present Year.

*Now for conclusion; all true Subjects pray,
 Long may King George the Royal Scepter Sway.*
